영어 영역

1번부터 17번까지는 듣고 답하는 문제입니다. 1번부터 15번까지는 한 번만 들려주고, 16번부터 17번까지는 두 번 들려줍니다. 방송을 잘 듣고 답을 하시기 바랍니다.

1. 다음을 듣고, 여자가 하는 말의 목적으로 가장 적절한 것을 고르시오.

- ① 친환경 제품 사용을 홍보하려고
- ② 음식 대접에 대한 감사를 표하려고
- ③ 간식이 마련되어 있음을 안내하려고
- ④ 휴식 시간이 변경되었음을 공지하려고
- ⑤ 구내식당 메뉴에 관한 의견을 구하려고

2. 대화를 듣고, 남자의 의견으로 가장 적절한 것을 고르시오.

- ① 인공 지능에서 얻은 정보를 맹목적으로 믿어서는 안 된다.
- ② 출처를 밝히지 않고 타인의 표현을 인용해서는 안 된다.
- ③ 인공 지능의 도움을 통해 과제물의 질을 높일 수 있다.
- ④ 과제를 할 때 본인의 생각이 들어가는 것이 중요하다.
- ⑤ 기술의 변화에 맞추어 작업 방식을 바꿀 필요가 있다.

3. 다음을 듣고, 여자가 하는 말의 요지로 가장 적절한 것을 고르시오.

- ① 소셜 미디어는 원만한 대인관계 유지에 도움이 된다.
- ② 온라인에서는 자아가 다양한 모습으로 표출될 수 있다.
- ③ 소셜 미디어는 자존감에 부정적인 영향을 줄 수 있다.
- ④ 친밀한 관계일수록 상대의 언행에 쉽게 영향을 받는다.
- ⑤ 유명한 사생활 보호의 중요성은 종종 간과된다.

4. 대화를 듣고, 그림에서 대화의 내용과 일치하지 않는 것을 고르시오.

5. 대화를 듣고, 남자가 할 일로 가장 적절한 것을 고르시오.

- ① 과학 캠프 지원하기 ② 참가 실험 결정하기
- ③ 체크리스트 작성하기 ④ 실험 계획서 보여주기
- ⑤ 자기 소개 영상 촬영하기

6. 대화를 듣고, 여자가 지불할 금액을 고르시오. [3점]

- ① \$50 ② \$55 ③ \$60 ④ \$65 ⑤ \$70

7. 대화를 듣고, 남자가 마술쇼에 갈 수 없는 이유를 고르시오.

- ① 록 콘서트에 가야 해서
- ② 다른 학교 축제에 가야 해서
- ③ 가족 중 아픈 사람이 있어서
- ④ 동아리 축제를 준비해야 해서
- ⑤ 삼촌 생일 파티에 참석해야 해서

8. 대화를 듣고, Victory Marathon에 관해 언급되지 않은 것을 고르시오.

- ① 행사 날짜 ② 신청 방법 ③ 출발 지점
- ④ 참가비 ⑤ 예상 참가 인원

9. Violet Hill Mentorship에 관한 다음 내용을 듣고, 일치하지 않는 것을 고르시오.

- ① 다음 주 금요일에 개최될 예정이다.
- ② 대학 생활에 관한 조언이 제공된다.
- ③ 신청 시 질문을 미리 제출해야 한다.
- ④ 신청 마감일은 다음 주 화요일이다.
- ⑤ 전공별 참가 가능한 인원은 20명이다.

10. 다음 표를 보면서 대화를 듣고, 두 사람이 구입할 무선 진공 청소기를 고르시오.

Cordless Vacuum Cleaner

	Model	Battery Life	Price	Wet Cleaning	Color
①	A	1 hour	\$300	×	Red
②	B	2 hours	\$330	×	White
③	C	2 hours	\$370	○	Red
④	D	3 hours	\$390	○	White
⑤	E	3 hours	\$410	○	Black

11. 대화를 듣고, 남자의 마지막 말에 대한 여자의 응답으로 가장 적절한 것을 고르시오.

- ① Fine. Let's talk about it over dinner.
- ② Okay. Be more responsible next time.
- ③ Great. I already ordered some pet food.
- ④ Too bad. I hope your cat gets well soon.

이제 듣기 문제가 끝났습니다. 18번부터는 문제지의 지시에 따라 답을 하시기 바랍니다.

18. 다음 글의 목적으로 가장 적절한 것은?

- ① 여행 일정 지연에 대해 사과하려고
- ② 잡지 온라인 구독을 권유하려고
- ③ 무료 잡지 신청을 홍보하려고
- ④ 여행 후기 모집을 안내하려고
- ⑤ 기사에 대한 독자 의견에 답변하려고

19. 다음 글에 드러난 'I'의 심경 변화로 가장 적절한 것은?

As I walked from the mailbox, my heart was beating rapidly. In my hands, I held the letter from the university I had applied to. I thought my grades were good enough to cross the line and my application letter was well-written, but was it enough? I hadn't slept a wink for days. As I carefully tore into the paper of the envelope, the letter slowly emerged with the opening phrase, "It is our great pleasure..." I shouted with joy, "I am in!" As I held the letter, I began to make a fantasy about my college life in a faraway city.

- ① relaxed → upset ② anxious → delighted
- ③ guilty → confident ④ angry → grateful
- ⑤ hopeful → disappointed

20. 다음 글에서 필자가 주장하는 바로 가장 적절한 것은?

Having a messy room can add up to negative feelings and destructive thinking. Psychologists say that having a disorderly room can indicate a disorganized mental state. One of the professional tidying experts says that the moment you start cleaning your room, you also start changing your life and gaining new perspective. When you clean your surroundings, positive and good atmosphere follows. You can do more things efficiently and neatly. So, clean up your closets, organize your drawers, and arrange your things first, then peace of mind will follow.

- ① 자신의 공간을 정돈하여 긍정적 변화를 도모하라.
- ② 오랜 시간 고민하기보다는 일단 행동으로 옮겨라.
- ③ 무질서한 환경에서 창의적인 생각을 시도하라.
- ④ 장기 목표를 위해 단기 목표를 먼저 설정하라.
- ⑤ 반복되는 일상을 새로운 관점으로 관찰하라.

21. 밑줄 친 luxury real estate가 다음 글에서 의미하는 바로 가장 적절한 것은? [3점]

The soil of a farm field is forced to be the perfect environment for monoculture growth. This is achieved by adding nutrients in the form of fertilizer and water by way of irrigation. During the last fifty years, engineers and crop scientists have helped farmers become much more efficient at supplying exactly the right amount of both. World usage of fertilizer has tripled since 1969, and the global capacity for irrigation has almost doubled; we are feeding and watering our fields more than ever, and our crops are loving it. Unfortunately, these luxurious conditions have also excited the attention of certain agricultural undesirables. Because farm fields are loaded with nutrients and water relative to the natural land that surrounds them, they are desired as luxury real estate by every random weed in the area.

* monoculture: 단일 작물 재배 ** irrigation: (논,밭에) 물을 댐; 관개

- ① a farm where a scientist's aid is highly required
- ② a field abundant with necessities for plants
- ③ a district accessible only for the rich
- ④ a place that is conserved for ecology
- ⑤ a region with higher economic value

22. 다음 글의 요지로 가장 적절한 것은?

When it comes to helping out, you don't have to do much. All you have to do is come around and show that you care. If you notice someone who is lonely, you could go and sit with them. If you work with someone who eats lunch all by themselves, and you go and sit down with them, they will begin to be more social after a while, and they will owe it all to you. A person's happiness comes from attention. There are too many people out in the world who feel like everyone has forgotten them or ignored them. Even if you say hi to someone passing by, they will begin to feel better about themselves, like someone cares.

- ① 사소한 관심이 타인에게 도움이 될 수 있다.
- ② 사람마다 행복의 기준이 제각기 다르다.
- ③ 선행을 통해 자신을 되돌아볼 수 있다.
- ④ 원만한 대인 관계는 경청에서 비롯된다.
- ⑤ 현재에 대한 만족이 행복의 필수조건이다.

23. 다음 글의 주제로 가장 적절한 것은?

We often try to make cuts in our challenges and take the easy route. When taking the quick exit, we fail to acquire the strength to compete. We often take the easy route to improve our skills. Many of us never really work to achieve mastery in the key areas of life. These skills are key tools that can be useful to our career, health, and prosperity. Highly successful athletes don't win because of better equipment; they win by facing hardship to gain strength and skill. They win through preparation. It's the mental preparation, winning mindset, strategy, and skill that set them apart. Strength comes from struggle, not from taking the path of least resistance. Hardship is not just a lesson for the next time in front of us. Hardship will be the greatest teacher we will ever have in life.

- ① characteristics of well-equipped athletes
- ② difficulties in overcoming life's sudden challenges
- ③ relationship between personal habit and competence
- ④ risks of enduring hardship without any preparation
- ⑤ importance of confronting hardship in one's life

24. 다음 글의 제목으로 가장 적절한 것은?

Your behaviors are usually a reflection of your identity. What you do is an indication of the type of person you believe that you are—either consciously or nonconsciously. Research has shown that once a person believes in a particular aspect of their identity, they are more likely to act according to that belief. For example, people who identified as “being a voter” were more likely to vote than those who simply claimed “voting” was an action they wanted to perform. Similarly, the person who accepts exercise as the part of their identity doesn't have to convince themselves to train. Doing the right thing is easy. After all, when your behavior and your identity perfectly match, you are no longer pursuing behavior change. You are simply acting like the type of person you already believe yourself to be.

Electronic Waste Collection and Recycling Rate
by Region in 2016 and 2019

The above graph shows the electronic waste collection and recycling rate by region in 2016 and 2019. ① In both years, Europe showed the highest electronic waste collection and recycling rates. ② The electronic waste collection and recycling rate of Asia in 2019 was lower than in 2016. ③ The Americas ranked third both in 2016 and in 2019, with 17 percent and 9 percent respectively. ④ In both years, the electronic waste collection and recycling rates in Oceania remained under 10 percent. ⑤ Africa had the lowest electronic waste collection and recycling rates in both 2016 and 2019, showing the smallest gap between 2016 and 2019.

26. Fritz Zwicky에 관한 다음 글의 내용과 일치하지 않는 것은?

Fritz Zwicky, a memorable astrophysicist who coined the term ‘supernova’, was born in Varna, Bulgaria to a Swiss father and a Czech mother. At the age of six, he was sent to his grandparents who looked after him for most of his childhood in Switzerland. There, he received an advanced education in mathematics and physics. In 1925, he emigrated to the United States and continued his physics research at California Institute of Technology (Caltech). He developed numerous theories that have had a profound influence on the understanding of our universe in the early 21st century. After being appointed as a professor of astronomy at Caltech in 1942, he developed some of the earliest jet engines and holds more than 50 patents, many in jet propulsion.

* patent: 특허(권) ** propulsion: 추진(력)

- ① 불가리아의 Varna에서 태어났다.
- ② 스위스에서 수학과 물리학 교육을 받았다.
- ③ 미국으로 이주하여 연구를 이어갔다.
- ④ 우주 이해에 영향을 미친 수많은 이론을 발전시켰다.
- ⑤ 초창기 제트 엔진을 개발한 후 교수로 임용되었다.

The hunter-gatherer lifestyle, which can ① be described as “natural” to human beings, appears to have had much to recommend it. Examination of human remains from early hunter-gatherer societies ② has suggested that our ancestors enjoyed abundant food, obtainable without excessive effort, and suffered very few diseases. If this is true, it is not clear why so many humans settled in permanent villages and developed agriculture, growing crops and domesticating animals: cultivating fields was hard work, and it was in farming villages ③ what epidemic diseases first took root. Whatever its immediate effect on the lives of humans, the development of settlements and agriculture ④ undoubtedly led to a high increase in population density. This period, known as the New Stone Age, was a major turning point in human development, ⑤ opening the way to the growth of the first towns and cities, and eventually leading to settled “civilizations.”

* remains: 유적, 유해 ** epidemic: 전염병의

30. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은? [3점]

Many human and non-human animals save commodities or money for future consumption. This behavior seems to reveal a preference of a ① delayed reward over an immediate one: the agent gives up some immediate pleasure in exchange for a future one. Thus the discounted value of the future reward should be ② greater than the un-discounted value of the present one. However, in some cases the agent does not wait for the envisioned occasion but uses their savings ③ prematurely. For example, early in the year an employee might set aside money to buy Christmas presents but then spend it on a summer vacation instead. Such cases could be examples of ④ weakness of will. That is, the agents may judge or resolve to spend their savings in a certain way for the greatest benefit but then act differently when temptation for immediate pleasure ⑤ disappears.

* envision: 계획하다

[31~34] 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

31. The costs of _____ are well-documented. Martin Luther King Jr. lamented them when he described “that lovely poem that didn’t get written because someone knocked on the door.” Perhaps the most famous literary example happened in 1797 when Samuel Taylor Coleridge started writing his poem *Kubla Khan* from a dream he had but then was visited by an unexpected guest. For Coleridge, by coincidence, the untimely visitor came at a particularly bad time. He forgot his inspiration and left the work unfinished. While there are many documented cases of sudden disruptions that have had significant consequences for professionals in critical roles such as doctors, nurses, control room operators, stock traders, and pilots, they also impact most of us in our everyday lives, slowing down work productivity and generally increasing stress levels.

* lament: 슬퍼하다

- ① misunderstandings ② interruptions
- ③ inequalities ④ regulations
- ⑤ arguments

32. There’s a lot of scientific evidence demonstrating that focused attention leads to _____. In animals rewarded for noticing sound (to hunt or to avoid being hunted for example), we find much larger auditory centers in the brain. In animals rewarded for sharp eyesight, the visual areas are larger. Brain scans of violinists provide more evidence, showing dramatic growth and expansion in regions of the cortex that represent the left hand, which has to finger the strings precisely, often at very high speed. Other studies have shown that the hippocampus, which is vital for spatial memory, is enlarged in taxi drivers. The point is that the physical architecture of the brain changes according to where we direct our attention and what we practice doing.

* cortex: (대뇌) 피질(皮質) ** hippocampus: (대뇌 측두엽의) 해마

- ① improved decision making
- ② the reshaping of the brain
- ③ long-term mental tiredness
- ④ the development of hand skills
- ⑤ increased levels of self-control

33. How did the human mind evolve? One possibility is that

_____ caused our brains to evolve the way they did. A human tribe that could out-think its enemies, even slightly, possessed a vital advantage. The ability of your tribe to imagine and predict where and when a hostile enemy tribe might strike, and plan accordingly, gives your tribe a significant military advantage. The human mind became a weapon in the struggle for survival, a weapon far more decisive than any before it. And this mental advantage was applied, over and over, within each succeeding generation. The tribe that could out-think its opponents was more likely to succeed in battle and would then pass on the genes responsible for this mental advantage to its offspring. You and I are the descendants of the winners. [3점]

- ① physical power to easily hunt prey
- ② individual responsibility in one's inner circle
- ③ instinctive tendency to avoid natural disasters
- ④ superiority in the number of one's descendants
- ⑤ competition and conflicts with other human tribes

34. To find the hidden potential in teams, instead of brainstorming, we're better off shifting to a process called brainwriting. The initial steps are solo. You start by asking everyone to generate ideas separately. Next, you pool them and share them anonymously among the group. To preserve independent judgment, each member evaluates them on their own. Only then does the team come together to select and refine the most promising options. By _____ before choosing and elaborating them, teams can surface and advance possibilities that might not get attention otherwise. This brainwriting process makes sure that all ideas are brought to the table and all voices are brought into the conversation. It is especially effective in groups that struggle to achieve collective intelligence. [3점]

* anonymously: 익명으로 ** surface: 드러내다

- ① developing and assessing ideas individually
- ② presenting and discussing ideas out loud
- ③ assigning different roles to each member
- ④ coming to an agreement on these options
- ⑤ skipping the step of judging these options

35. 다음 글에서 전체 흐름과 관계 없는 문장은?

Simply giving employees a sense of agency—a feeling that they are in control, that they have genuine decision-making authority—can radically increase how much energy and focus they bring to their jobs. ① One 2010 study at a manufacturing plant in Ohio, for instance, carefully examined assembly-line workers who were empowered to make small decisions about their schedules and work environment. ② They designed their own uniforms and had authority over shifts while all the manufacturing processes and pay scales stayed the same. ③ It led to decreased efficiency because their decisions were not uniform or focused on meeting organizational goals. ④ Within two months, productivity at the plant increased by 20 percent, with workers taking shorter breaks and making fewer mistakes. ⑤ Giving employees a sense of control improved how much self-discipline they brought to their jobs.

* radically: 급격하게 ** shift: (근무) 교대

As businesses shift some core business activities to digital, such as sales, marketing, or archiving, it is assumed that the impact on the environment will be less negative.

- (A) When we store bigger data on clouds, increased carbon emissions make our green clouds gray. The carbon footprint of an email is smaller than mail sent via a post office, but still, it causes four grams of CO₂, and it can be as much as 50 grams if the attachment is big.
- (B) However, digital business activities can still threaten the environment. In some cases, the harm of digital businesses can be even more hazardous. A few decades ago, offices used to have much more paper waste since all documents were paper based.
- (C) When workplaces shifted from paper to digital documents, invoices, and emails, it was a promising step to save trees. However, the cost of the Internet and electricity for the environment is neglected. A recent *Wired* report declared that most data centers' energy source is fossil fuels. [3점]

Problems often arise if an exotic species is suddenly introduced to an ecosystem.

- (A) The grey had the edge because it can adapt its diet; it is able, for instance, to eat green acorns, while the red can only digest mature acorns. Within the same area of forest, grey squirrels can destroy the food supply before red squirrels even have a bite.
- (B) Britain's red and grey squirrels provide a clear example. When the grey arrived from America in the 1870s, both squirrel species competed for the same food and habitat, which put the native red squirrel populations under pressure.
- (C) Greys can also live more densely and in varied habitats, so have survived more easily when woodland has been destroyed. As a result, the red squirrel has come close to extinction in England.

Farmers, on the other hand, could live in the same place year after year and did not have to worry about transporting young children long distances.

Growing crops forced people to stay in one place. Hunter-gatherers typically moved around frequently, and they had to be able to carry all their possessions with them every time they moved. (①) In particular, mothers had to carry their young children. (②) As a result, hunter-gatherer mothers could have only one baby every four years or so, spacing their births so that they never had to carry more than one child at a time. (③) Societies that settled down in one place were able to shorten their birth intervals from four years to about two. (④) This meant that each woman could have more children than her hunter-gatherer counterpart, which in turn resulted in rapid population growth among farming communities. (⑤) An increased population was actually an advantage to agricultural societies, because farming required large amounts of human labor.

* counterpart: (대응 관계에 있는) 상대

By comparison, birds with the longest childhoods, and those that migrate with their parents, tend to have the most efficient migration routes.

Spending time as children allows animals to learn about their environment. Without childhood, animals must rely more fully on hardware, and therefore be less flexible. (①) Among migratory bird species, those that are born knowing how, when, and where to migrate—those that are migrating entirely with instructions they were born with—sometimes have very inefficient migration routes. (②) These birds, born knowing how to migrate, don't adapt easily. (③) So when lakes dry up, forest becomes farmland, or climate change pushes breeding grounds farther north, those birds that are born knowing how to migrate keep flying by the old rules and maps. (④) Childhood facilitates the passing on of cultural information, and culture can evolve faster than genes. (⑤) Childhood gives flexibility in a changing world. [3점]

Over the last several decades, scholars have developed standards for how best to create, organize, present, and preserve digital information for future generations. What has remained neglected for the most part, however, are the needs of people with disabilities. As a result, many of the otherwise most valuable digital resources are useless for people who are deaf or hard of hearing, as well as for people who are blind, have low vision, or have difficulty distinguishing particular colors. While professionals working in educational technology and commercial web design have made significant progress in meeting the needs of such users, some scholars creating digital projects all too often fail to take these needs into account. This situation would be much improved if more projects embraced the idea that we should always keep the largest possible audience in mind as we make design decisions, ensuring that our final product serves the needs of those with disabilities as well as those without.

The needs of people with disabilities have often been (A) in digital projects, which could be changed by adopting a(n) (B) design.

All humans, to an extent, seek activities that cause a degree of pain in order to experience pleasure, whether this is found in spicy food, strong massages, or stepping into a too-cold or too-hot bath. The key is that it is a ‘safe threat’. The brain perceives the stimulus to be painful but ultimately (a) non-threatening. Interestingly, this could be similar to the way humor works: a ‘safe threat’ that causes pleasure by playfully violating norms. We feel uncomfortable, but safe. In this context, where (b) survival is clearly not in danger, the desire for pain is actually the desire for a reward, not suffering or punishment. This reward-like effect comes from the feeling of mastery over the pain. The closer you look at your chilli-eating habit, the more remarkable it seems. When the active ingredient of chillies—capsaicin—touches the tongue, it stimulates exactly the same receptor that is activated when any of these tissues are burned. Knowing that our body is firing off danger signals, but that we are actually completely safe, (c) produces pleasure. All children start off hating chilli, but many learn to derive pleasure from it through repeated exposure and knowing that they will never experience any real (d) joy. Interestingly, seeking pain for the pain itself appears to be (e) uniquely human. The only way scientists have trained animals to have a preference for chilli or to self-harm is to have the pain always directly associated with a pleasurable reward.

An airplane flew high above the deep blue seas far from any land. Flying the small plane was a student pilot who was sitting alongside an experienced flight instructor. As the student looked out the window, (a) she was filled with wonder and appreciation for the beauty of the world. Her instructor, meanwhile, waited patiently for the right time to start a surprise flight emergency training exercise.

(B)

Then, the student carefully flew low enough to see if she could find any ships making their way across the surface of the ocean. Now the instructor and the student could see some ships. Although the ships were far apart, they were all sailing in a line. With the line of ships in view, the student could see the way to home and safety. The student looked at (b) her in relief, who smiled proudly back at her student.

(C)

When the student began to panic, the instructor said, “Stay calm and steady. (c) You can do it.” Calm as ever, the instructor told her student, “Difficult times always happen during flight. The most important thing is to focus on your flight in those situations.” Those words encouraged the student to focus on flying the aircraft first. “Thank you, I think (d) I can make it,” she said, “As I’ve been trained, I should search for visual markers.”

(D)

When the plane hit a bit of turbulence, the instructor pushed a hidden button. Suddenly, all the monitors inside the plane flashed several times then went out completely! Now the student was in control of an airplane that was flying well, but (e) she had no indication of where she was or where she should go. She did have a map, but no other instruments. She was at a loss and then the plane shook again.
